

Gentlemen,

I am happy to announce to you that we have installed the DC to DC converter from Joe and the unit is working perfectly as at this evening when the test was done. It is so amazing that at time a when we measure the power consumption it was as low as 150 watts. Please hold your breath! It sounds incredible and unbelievable but my two eyes saw it. Joe has to explain what he has put in the converter. Its simply magical!
Now we are in business in Nigeria!

But why did Joe keep the "BEST WINE" away from me for this long! (John 2: 10, the Holy Bible).

We shall do a complete day testing tomorrow. The conventional air conditioner in my office has been disconnected and it will be physically removed leaving only the Millenia to cool our ground flook office. Aggressive marketing campaign will commence immediately. There shall be formal launching sometime in September (if there is still need for it).

Kindly expect a mind-blowing order of nothing less that 1000 units very soon from me. Take my word for it. We shall go all the way to dominate and saturate the Nigeria and the African market with Millenia. I am so excited that I can not even talk. If I could order two containers without any proof then what do you expect when the proof is right in my hands. Joe works and the Millenia is working!

God bless you all. I am happy that my confidence an trust in the partnership is working and will soon bring forth fruits of coooool cash!

Consider the LC done! I expect the bank to come for a presentation and demonstration before the end of the week. QED. No more story. I want the LC and I want it NOW!

Warmest regards to all and God bless.
